

Zinc Copper Cobalt Selenium & B12

A highly concentrated liquid vitamin, chelated mineral and trace element supplement for cattle and sheep.

- Specifically formulated to provide essential elements in a form that is quickly absorbed and efficiently utilised.
- A combination of essential elements will help ensure healthy blood, good muscle tone, correct metabolic functioning, correctly functioning internal organs and connective tissue and high fertility levels in both males and females.
- The addition of Zinc helps maintain healthy hoof condition.
- The addition of Copper helps maintain growth, pigmentation and general condition.

Features & Benefits

Feature	Advantage	Benefit
Energy source base	Rapidly available/digestible energy source	Boost energy of animal after drenching
High levels of all essential elements and vitamin B12	Helps promote healthy blood, organ and muscle tone	Maximise health and disease resistance, promotes muscle condition and weight gain
Emulsified Vitamins/Minerals	Vitamins and minerals are rapidly absorbed into the bloodstream, starting as soon as it's in the mouth	Maximises the effect with a quicker reaction time
Contains Zinc	Improves hoof quality	Less foot problems
Chelated trace elements	Easily absorbed	Fast acting

Retailer Tip

- Ideal for use in Copper deficient areas.
- Even when animals are not showing signs of deficiency, significant reductions in performance and profitability may occur.
- The drench has been specifically designed to help bolster the specific needs of livestock that are prone to Cobalt, Selenium and Copper deficiency, and should only be given to animals that require additional supplementation.

Presentation

Opaque Purple Liquid.

Composition

Vitamins and Trace Elements.
