

Osmonds Adopta-Lamb is a 100% Natural and Organic product containing a synergistic blend of naturally occurring beneficial micro-organisms and Enzymes. It naturally breaks down the organic waste materials on the lamb, rapidly removing the organic based odours and scents on the lamb which can often trigger rejection by the fostering ewe.

- *Non-toxic and safe to humans, animals, plants, soil and water-courses*
- *Will save endless hours of work and frustration trying to encourage adoption of lambs*
- *Please Note for best performance do NOT use in conjunction with chemicals or performance may be impaired.*
- *In cases of twin or triplet lambs - ALL Lambs must be sprayed*

Instructions

Shake container well
Spray product liberally all over the lamb ensuring the liquid covers all parts of the lamb. Leave for approx 30 seconds before introducing lamb to foster Ewe. If lamb is rejected, spray again all over before making a further attempt to foster.
