

Effective Footbath Concentrate to help maintain healthy feet in Sheep

- Unique Combination of Natural Mycocidal Acids with added Ionised Mixed Metal Salts including Copper and Tea Tree Oil.
- Helps maintain freedom from Hoof / Feet problems.
- Contains a scientifically selected combination of Ionised Metal Salts delivered in an acidified form.
- Cost Effective
- Safe replacement to Formalin

Directions

For use in Footbaths

Dilute 2-8% Hoof Rite i.e. 2-8 litres
in 100 litres clean water.
Discard and refill after the third time of use.

Spot treatment

Dilute 20% Hoof Rite i.e. 200ml
in 1 litre clean water, and spray onto the clean
and / or trimmed area

The animal should be foot-bathed 3 times
in succession every 2 weeks as part of a hoof
care programme

**For optimum results
please ensure that the
animal's feet are clean and
that they either stand in
the footbath or are run
through the footbath 2/3
times for maximum
coverage of the feet.**

Availability

5 litre - £57.00 (inc VAT)
25 litre - £171.00 (inc VAT)
