

Pre-Tupping + Pre & Post Lambing Drench

A highly concentrated Vitamin & Trace Element Supplement for Sheep, containing Bioplex protected minerals.

- Specifically formulated to help improve condition prior to tupping thus increasing ovulation and fertilisation rate, and helping produce healthy, well developed offspring by ensuring Vitamins and Minerals are available at the correct levels
- Formulated on an emulsified base, providing a fast and efficient route for administration and absorption, providing good palatability and easy acceptance
- By including all round higher levels of Nutrients than similar products and recommending drenching at every 4-6 weeks PRE-TUPPING may help maintain the wellbeing of ewes, lambs and tups thus ensuring optimum performance.

Feeding Instructions

Sheep: 15-25 ml depending on size
 Tups: 20-30ml depending on size
 Drench every 7 days during the season
 Lambs (by bodyweight) 8 - 14kg 5ml
 15 - 24kg 10ml
