

A highly concentrated Vitamin & Trace Element Supplement for Cattle and Sheep containing chelated minerals.

- Specifically formulated to help improve condition prior to conception thus increasing ovulation and fertilisation rate, and helping produce healthy, well developed offspring by ensuring Vitamins and Minerals are available at the correct levels
- Formulated on an emulsified base, providing a fast and efficient route for administration and absorption, providing good palatability and easy acceptance
- By including all round higher levels of Nutrients than similar products and recommending drenching at every 4-6 weeks THRIVIT may help maintain the wellbeing of cows, calves and bulls thus ensuring optimum Performance, Thriftiness, Growth etc.
