

All Natural Supplement that provides Instant Energy to the new born calf to help maintain against disease factors

- *Boosts the calves' intake of colostrum derived immunoproteins, energy-generating substrates and micro-nutrients to help maintain resistance from disease factors*
- *Contains Vetoxan - important in the establishment of an internal alimentary environment in which E.coli bacteria cannot grow and develop*
- *Vetoxan also helps remove the Meconium (black plug) allowing calves to thrive from an early age*

Instructions

Feed 25ml to at risk calves as soon as possible after birth

Repeat if necessary

Contents (per litre)
