

Osmonds Lifesaver Calf Supplement Gel is a fast acting powdered supplement containing gel, vitamins, minerals, electrolyte, Vetoxan and health maintaining nutrients for calves, in particular those at risk from bacterial infections

- *Contains Fibre Gel product and added electrolyte for increased efficiency*
- *Also contains Vetoxan which helps inhibit the growth of pathogenic bacteria and stimulates the growth of beneficial alimentary tract bacteria encouraging bacterial growth through the provision of essential micro-metabolites.*
- *Also contains Vitamins, Minerals, Trace Elements & Amino Acids which help optimise the metabolism and correct micro-nutrient deficiencies.*

Feeding Instructions

Simply add warm water (37°C) to the contents of the bottle, secure cap, shake vigorously and feed contents to calf immediately (otherwise the fibre content will begin to gel and make feeding difficult).

Contents
