

Osmonds Joint Supplement is a liquid supplement providing a recommended 10g Glucosamine along with MSM, Chondroitin and antioxidant support.

- Ideal supplement for horses that may suffer from joint degeneration and associated problems along with older horses.
- Excellent for horses exposed to high levels of concussive force.
- Daily dietary inclusion may help support the joints of horses and maintain correct function.

Benefits ...

- *Highly palatable and easily absorbed*
- *MSM is a source of organic sulphur which is an essential component of connective tissue, skin, hooves and amino acids. Sulphur from MSM is used in the formation of many protein rich structures within the body*
- *Glucosamine is a key factor in the production of glycosaminoglycans - essential in collagen and connective tissue production and also composes over half of Hyaluronic Acid - found within the joint structures*
- *Chondroitin's primary function is to inhibit degradative enzymes contributing to cartilage breakdown*
- *Cost effective - from 24 - 48p per horse per day dependent on size*
- *Can swap straight over from competitor product without any problems*

Daily Feeding Instructions

(add directly to feed as required)

15 - 30ml in the feed depending on size of horse / pony

Availability

1 litre £24.90
5 litre £99.90
