

***Osmonds Osmolyte is a liquid electrolyte formulated for daily feeding.***

Osmolyte is an essential part of the diet for performance horses and daily use may help speed up the return to optimum condition after competition or heavy work thus allowing the horse to recover faster and perform at maximum levels without a loss of performance

### ***Benefits ...***

- Contains high levels of the minerals Sodium, Chloride and Potassium - vital for the regulation of the acid base balance, and Magnesium and Calcium - for nerve and muscle function
- Contains Zinc, Vitamin E, Selenium and Copper - helps ensure vital elements are supplied to help maintain correct muscle function
- Palatable - molasses base
- Liquid - more easily absorbed
- Ensures the horse receives sufficient levels of electrolytes after exertion and this may help avoid the loss of essential salts allowing faster recovery and maximum performance
- Feed daily to horses in medium to hard work (in evening feed)
- Feed after heavy training or competition
- Ensure clean drinking water available at all times

### **Daily Feeding Instructions**

(In the Feed or in clean drinking water which should be available at all times)

Maintenance 60ml per day

After strenuous exercise or travel 90-180ml

It is recommended that a specialist opinion be sought before use. DO NOT exceed 300ml per horse per day.

### **Availability**

1 litre	£13.90
5 litre	£56.90

### **Analysis per litre**

Sodium (as Chloride)	25g
Calcium (as Chloride)	25g
Magnesium (as Chloride)	5g
Potassium (as Chloride)	5g
Chloride	38g
Vitamin E	4000mg
Zinc (as Chloride)	4g
Selenium (as Selenite)	2.88mg
Copper (as Sulphate)	1mg
